Medical Aesthetics Technologies for MedSpa and Dermatologist

Non-Invasive Bio Electrical Stimulation Technology For Weight Loss Management

FDA

510 K

Hi-Lipo Contour

Bio Stimulation is a treatment that promotes skin and muscle repair and rejuvenation by stimulating your body's electrical healing system. Its specially designed frequencies provide workout for abdominal and other muscles effectively. It is 150 times more intense than a crunch.

- ✓ **Three Modes - Sculpt, Tone & Power**
- ✓ 7" large Full color LCD touch screen interface.
- ✓ 4 Independent Output to treat multiple areas
- ✓ 3D Penetration, 100% Vector Modulation

40KHz Ultrasound Cavitation For Cellulite Reduction

- ✓ Reduction of appearance of Cellulite
- ✓ Reduction of waist, abdomen and buttocks
- ✓ Skin tightening and improve elasticity
- ✓ It is non-invasive, and not painful !

Hi-Lipo Cavi

It's a true alternative to surgical liposuction. It uses low frequency ultrasound to obtain a cavitation effect which reduces localized fat deposits. Cavitation is used to break down adipose tissue through an emulsification process.

Deep Heat and Vacuum Therapy For Detoxification

Hi-Lipo Detox

Detoxification is removing impurities and toxins from fat cells. It is done by the vacuum and heat therapy. This combination burns fat and removes toxins. Hi-Lipo Detox combo is smart, sturdy and lightweight ABS constructed body. It is one of the most advanced and convenient infrared deep heat therapy combined with powerful vacuum therapy systems.

- ✓ Breaks up Fat Cells
- ✓ Stimulates the metabolism
- ✓ Movement of the lymph fluid
- ✓ Aiding the removal of toxins and waste products
- ✓ Increases level of oxygen in cells
- ✓ Improves muscle tone and strength
- ✓ Increases energy levels

Personal Care Device

- Relaxation
- Pain Relief
